PROJECTS

Sunglasses E-Commerce Backend API

July 2026

github.com/soham-suthar/Sunglasses-Backend

- Architected a modular REST API using Node.js, Express.js, MongoDB, and Mongoose following MVC architecture
- Implemented secure JWT authentication, bcrypt password hashing, Zod validation, and role-based authorization
- Engineered a secure checkout/order flow using atomic MongoDB updates and an admin dashboard with aggregation pipelines

Cars Dashboard

June 2026

cars-dashboard-orpin.vercel.app

- Engineered a dynamic, single-page dashboard application to track and visualize vehicle inventory, prioritizing a responsive mobile-first layout
- Implemented efficient client-side state management for real-time filtering, sorting, and search
- Streamlined deployment and hosting via Vercel, establishing an automated CI/CD pipeline to ensure continuous delivery and reliable performance

Personal Portfolio Website

May 2026

portfolio-two-dusky-47.vercel.app

- Developed responsive portfolio website with modern UI and smooth animations
- Implemented clean and professional design to showcase projects and technical skills
- Optimized deployment workflow using Vercel
